Vigilo

ACCESSORIES

GPS tracking with multi-network and Starlink connectivity

Your fleet stays connected even where there is no mobile signal: multi-network 4G/5G coverage and, when there is no signal, Starlink satellite connection. GPS, video and vehicle data can continue to be transmitted to the Vigilo platform via satellite connectivity when there is no mobile coverage, provided the...

Multi-network 4G/5G | **Starlink satellite** | **Automatic switching** | **On-board Wi-Fi**

HOW IT WORKS

Two networks, one connection

Multi-network

The multi-network SIM connects to the mobile network with the best signal in each area, without depending on a single operator.

Satellite when there is no mobile signal

In mountains, rural areas or far from cell towers, the connection switches automatically to Starlink satellite.

All in the Vigilo platform

Position, camera video, CAN bus data and alarms are sent to the platform over the connection available at any given time.

COVERAGE

Where each option reaches

✓ Usual coverage · ◖ Partial coverage · — No coverage. For guidance only: depends on the area and the plan.

WHO IT IS FOR

Designed for fleets working far from everything

International transport

More coverage on long routes and mountain passes.

Construction and quarries

Machinery and vehicles connected where there are no cell towers.

Agriculture and forestry

Tractors and vehicles on farms and in forests.

Emergency and utility services

Communication when it matters most.

WHAT IS INCLUDED

One kit, installed and managed by Vigilo

- Compact Starlink antenna Flat roof antenna with built-in Wi-Fi. Approx. 30 × 26 cm, average consumption 25–40 W.
- Multi-network router Handles automatic switching between the mobile network and satellite.
- Multi-network SIM Connects to the mobile network with the best coverage at any time.
- Installation and platform Installation in your vehicle and connection status on the Vigilo platform.

Does your fleet work outside coverage?

We prepare a connectivity proposal based on your routes and vehicles.
